

Quick Check[®] Customer Testimonials

HUNTER
Engineering Company

Kauffman Tire *Ellenwood, GA*

“ Hunter Quick Tread® and Quick Check® are on the leading edge of inspection equipment. It is truly game changing technology that will serve to transform the industry as a whole. ”

Mark Kauffman
President, Kauffman Tire

Elco Chevrolet Cadillac *Ballwin, MO*

“With the addition of Quick Tread® and Quick Check® in our service drive we are now doing anywhere from 260 to 300 alignments per month. This has really helped the bottom line. We are seeing a monthly revenue of about \$20,000.”

Bill Nickelson
Fixed Operations Manager, Elco Chevrolet Cadillac

Before adding Quick Tread® and Quick Check® to our service drive we were only performing about 82 to 95 alignments a month.

With the addition of Quick Tread® and Quick Check® in our service drive we are now doing anywhere from 260 to 300 alignments per month. This has really helped the bottom line. We are seeing a monthly revenue increase of about \$20,000.

Now, with Quick Tread® and Quick Check® we check the tire tread depth and alignment condition of every car that comes through our doors, to make sure no untapped revenue is lost.

Here at ELCO Chevrolet Cadillac, the service advisor will go over the Quick Tread® and Quick Check® printout with every customer. The customers appreciate being given the vehicle results and are able to be updated on their vehicle condition with the color-coded graphs on the printout.

We have no complaints whatsoever with our Hunter support team. We have rarely had any problems, but when we do, they come right out to help us. Hunter has really great customer support. Our Hunter team is really good to work with.

Hunter Quick Tread® and Quick Check® have been well worth the investment for us.

Bill Nickelson
Fixed Operations Manager, ELCO Chevrolet Cadillac

Nurse Chevrolet Cadillac Whitby, Ontario, Canada

“ Before the Quick Check® was installed, [we] checked ten vehicles per day.

With the three Hunter Quick Check® systems in place, 1058 vehicles were tested in 13 days, 558 of which, failed. What an opportunity this has created for the Service Department! ”

Mary Nurse
President, Nurse Chevrolet Cadillac Ltd.

In 2012, the Quick Check® was introduced to Nurse Chevrolet Cadillac Ltd., Whitby, Ontario, Canada. The ease of use, the speed of the analysis, and the accuracy of the results led Nurse Chevrolet Cadillac to purchase the product for all three Service Reception lanes. The technology was available to demonstrate to customers, without a doubt, the status of the alignment of their vehicle.

The true test of this equipment is in the numbers. Before the Quick Check® was installed, Nurse Chevrolet Cadillac, alignment department checked ten vehicles per day. With the three Hunter Quick Check® systems in place, 1058 vehicles were tested in 13 days, 558 of which, failed. What an opportunity this has created for the Service Department!

Hunter Engineering does not just sell equipment. The installation by Hunter, in all cases has been done in a non-disruptive and timely basis. The technical installation staff always ensures that the product has been installed properly. No comeback calls!

Once installed there was the training portion required to operate the equipment. The trainer, in all cases, made sure that all staff were confident in the operation of the equipment. A suitable amount of time was spent to ensure that all abnormalities that could possibly occur did. Dealership staff response was very positive to the thoroughness of the equipment training.

The complete package provided by Hunter Engineering has been extremely beneficial for this company. Our staff and customers are very pleased with the information that is able to be provided during each visit. This latest piece of equipment and training has enabled staff to provide an explanation as to why the alignment should be done on their vehicle. What a great information and selling tool!

Yours truly,

Mary Nurse, President, Nurse Chevrolet Cadillac Ltd.
