

WinAlign® HD Customer Testimonials

HUNTER
Engineering Company

Vanguard Truck Centers *Houston, TX*

“WinAlign® HD has created so much additional business that we have hired another alignment tech.

But perhaps the greatest feature of this system is the additional revenue it has created for us!”

A handwritten signature in black ink that reads "Craig Robinson".

Craig Robinson

Service Director, Vanguard Mack

Forest River Inc.

Elkhart, IN

“With the WinAlign® HD alignment systems, we receive accurate results in minutes. We have transformed our inspection and alignment process into a productive assembly line that makes us money and saves us time. We are very happy with the WinAlign® HD and our Hunter team is always right on top of it.”

Scott Chambers
Plant Manager, Forest River Inc.

Forest River, Inc.
Forest River Manufacturing, LLC

Since we invested in our WinAlign® HD unit about a year ago, we have had an absolutely huge increase in efficiency.

We have also seen a drastic decrease in the amount of wear and tear our technicians face on a daily basis. They have had no complaints about the new systems and find them extremely easy to use.

With the WinAlign® HD alignment systems, we receive accurate results in minutes. We have transformed our inspection and alignment process into a productive assembly line that makes us money and saves us time.

Our local Hunter team is also attentive and responsive, and Josh has been absolutely great. If we have questions they are quick to answer or stop by. They even stop in just to check in on us and the equipment. We are very happy with the WinAlign® HD and our Hunter team is always right on top of it.

Truck Fleet Repair ***Norfolk, VA***

“We constantly track the efficiency and proficiency of all aspects of our shop, including the equipment. WinAlign® HD not only meets, but exceeds our rigorous standards.

I see the value of owning the WinAlign® HD every day.”

Charles L. Marks
President, Truck Fleet Repair

American Frame and Axle **Tampa, FL**

“I would recommend Hunter's WinAlign® HD to anyone, in fact, I tell other industry leaders that Hunter equipment is always dependable, accurate, easy-to-use and drives profit in our shop.”

Complete Truck Repairs • Alignments • Frame Straightening

After over ten years, our previous alignment equipment was costing more to maintain than purchasing new equipment. We were confident that the place to look for the latest, greatest HD aligner was Hunter Engineering Company.

We contacted Hunter and decided to install the new WinAlign® HD alignment system in our shop. It was a very easy transition for us. With minimal training, our three alignment techs became proficient on the new equipment in no time. With the new WinAlign® HD we are performing 4-10 alignments on each machine per day!

I would recommend Hunter's WinAlign® HD to anyone, in fact I tell other industry leaders that Hunter equipment is always dependable, accurate, easy-to-use and drives profit in our shop.

It is always a pleasure to work with our local Hunter team. They are always very attentive to our needs. In fact we put in a service call in the morning and our representative was there fixing it by the afternoon. Hunter's WinAlign® HD was the right choice for us for many reasons.

Moore Tires

Rock Falls, IL

“In just a few short months, we have doubled our average alignment sales and our return on investment is going to be much shorter than we anticipated.

Hunter's new WinAlign® HD is truly first class.”

Jeff Moore

Owner, Moore Tires

We decided to invest in Hunter's WinAlign® HD because we were looking to increase our productivity and make our alignment techs capable of handling any alignment job from passenger cars all the way to heavy-duty trucks.

Hunter's WinAlign® HD has made both of these things happen for us. With Hunter's six-sensor WinAlign® HD unit, there is no need to jack each axle, so our technicians were quickly able to transition to heavy-duty trucks. This has really boosted our productivity and our alignment count.

In just a few short months, we have doubled our average alignment sales and our return on investment is going to be much shorter than we anticipated. We also received incredible training on the new system from our local Hunter team, which helped us get the most out of our investment.

Hunter's new WinAlign® HD is truly first class.

Jeff Moore

Owner, Moore Tires
